

# Status of KEK FE electronics

2016/Sep/22, K.Sakashita

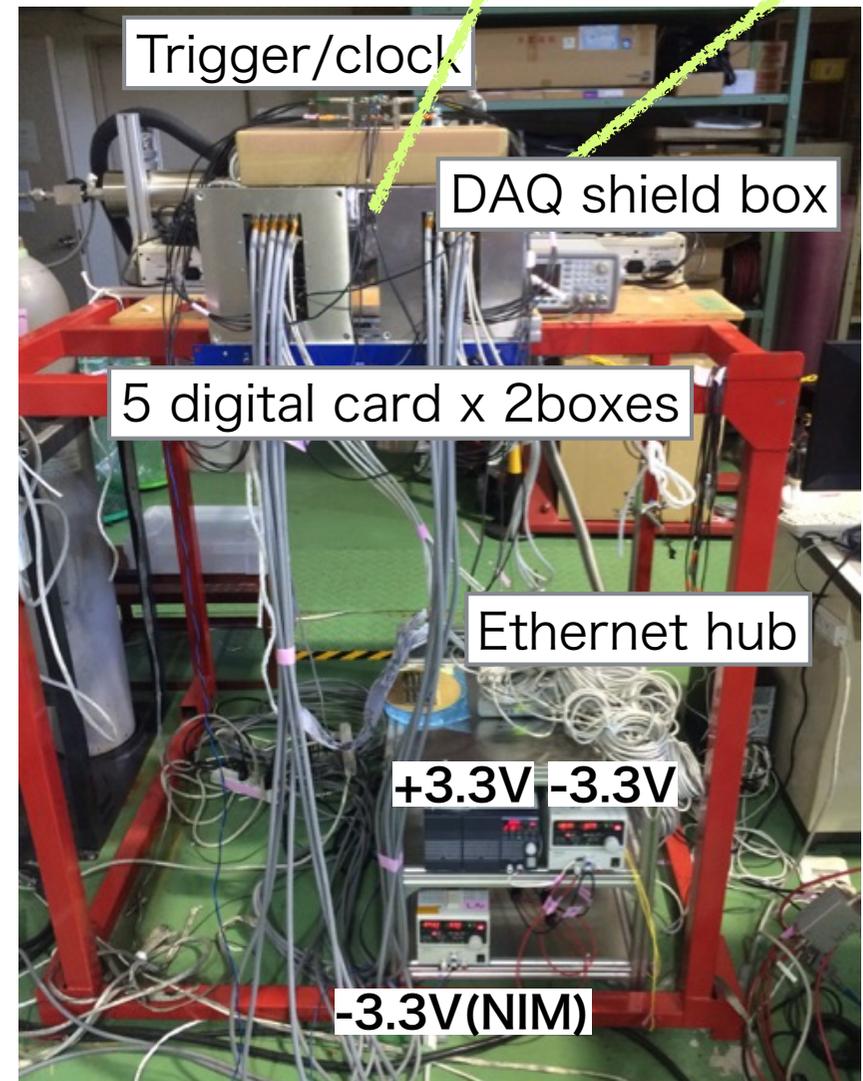

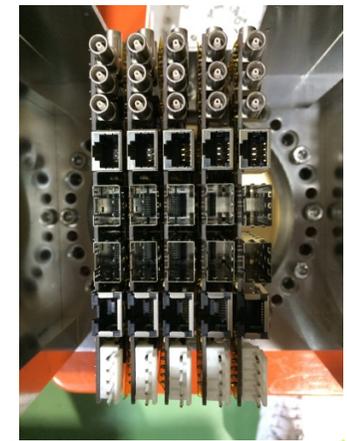

# Status

- Basic performance test of all the 10 FE cards was completed
  - there are no dead channels
  - measured performance is as expected
  - summarizing the results (total 640ch) in progress

# Status (cont.)

- System commissioning at KEK is on-going
  - Configuration:
    - all the DAQ card connect to the warm feedthrough and covered by a DAQ shield box
    - all the analog FE cards connect to the cold feedthrough
  - Test items:
    - DAQ performance, noise level, test pulse injection, long-term stability etc.

cold FT

warm FT
